

EVAN L. GRANITO

SYSTEMS ADMINISTRATOR · INFRASTRUCTURE & SECURITY

Saratoga Springs, NY | (zrE

518)-560-9286 | evang@tutamail.com

PROFESSIONAL SUMMARY

Systems administrator with over a decade of experience building, hardening, and maintaining Linux-first infrastructure across small business and enterprise environments. Extensive background in network security, virtualization, and automation, with a record of replacing manual processes with reliable, scripted deployments.

CORE COMPETENCIES

Security & Networking	nftables, iptables, ipset, WireGuard, OpenVPN, EasyRSA / PKI, SSH hardening, WAF administration, malware removal, Wireshark, tshark, tcpdump, nmap, network segmentation, BIND, GPG, Squid, 3proxy
Systems	Debian, Ubuntu, RHEL, Arch, Gentoo, Kali, Parrot, FreeBSD, OpenBSD, pfSense, OPNsense, Windows Server 2022, macOS
Automation	Bash, Python, Go, C, SQL, PHP, sed, awk, Ansible, cron, Git, GitHub, GitLab
Infrastructure	KVM, libvirt, Proxmox, Docker, Docker Compose, TrueNAS Scale, Unraid, GCP, Nginx, Apache, LiteSpeed, MySQL, PostgreSQL, Postfix, Dovecot, Exim, cPanel, DirectAdmin, WHMCS
Web & Application	Django, Flask, FastAPI, HTML, CSS, JavaScript, WordPress, WooCommerce, Drupal, Magento, Shopify, Matomo

PROFESSIONAL EXPERIENCE

Systems Administrator

May 2022 – Present

Music Industry Marketing, LLC · Atlanta, GA (Remote)

- Automate Linux system deployments with Ansible and maintain Windows Server 2022 automation environments.
- Deploy and administer proxy edge infrastructure, cloud VNC workstations, and virtualized Android environments.
- Administer MySQL and PostgreSQL servers and develop Python and Bash tooling that replaces recurring manual work.
- Analyze network traffic and system logs with tcpdump, tshark, and pyshark to isolate system, application, and network faults.
- Design and manage the company Shopify storefront and execute SEO and keyword-competitor research.

Principal Consultant

December 2018 – Present

Arcane Solutions, LLC · Saratoga Springs, NY

- Deploy and manage LEMP stacks on cloud KVM infrastructure for client web properties.
- Automate provisioning, updates, and patching with Ansible; build and maintain automated offsite backup pipelines.
- Handle full-lifecycle web design, hosting, e-commerce integration, inventory management, and authoritative DNS.

Systems Administrator & Automation Development Lead

February 2019 – May 2022

Organic Music Marketing · Atlanta, GA (Remote / Hybrid)

- Deployed and scaled Linux servers and KVM virtual machines, tuning Nginx and MySQL for performance and availability.
- Built Docker images and managed multi-service deployments with Docker Compose.
- Deployed and maintained OpenVPN servers and an internal certificate authority using EasyRSA.
- Implemented security hardening standards across servers, workstations, and office network

equipment.

Technical Support Engineer (Systems Administrator) March 2015 – December 2018

KnownHost, LLC · Remote

- Administered KVM and OpenVZ virtualization environments with a focus on uptime and performance.
- Managed cPanel, DirectAdmin, and WHMCS hosting environments across a large shared customer base.
- Configured Apache, Nginx, and LiteSpeed with PHP-FPM tuning; managed MySQL databases and query performance.
- Performed malware removal, firewall and WAF configuration, and post-incident security hardening.

Support Technician

June 2011 – June 2015

ViaTalk · Clifton Park, NY

- Supported VoIP systems via phone, ticketing, and chat; troubleshoot connectivity, call quality, and routing issues.
- Managed customer router and gateway hardware; resolved international calling faults with carrier backbone providers.

EDUCATION & CERTIFICATIONS

Google Cybersecurity Certificate

November 2023

Ballston Spa High School · Ballston Spa, NY

Class of 2011

Open to remote and relocation opportunities · Additional project details and references available upon request
